

November 1, 2011

Dear Patient:

After forty-one years of medicine, I will be retiring at the end of this year from the Arizona Asthma and Allergy Institute, which I founded in 1980. We have grown to seven board certified allergists, three physician assistants and a nutritionist, operating out of four offices. Many of our doctors are consistently voted "Best Doctors" in the by annually Phoenix Magazine.

Our practice will continue to be in the forefront of care for asthma, allergic and non-allergic nasal disease, recurrent otitis media and sinusitis, recurrent infections and immunodeficiency, atopic dermatitis, chronic hives, contact dermatitis, allergic and non-allergic food sensitivities and eosinophilic gastrointestinal disease.

We will continue to be involved in teaching, both in lecture form in the various residency programs and for allergy rotations in our offices. We support Camp Not-A-Wheeze, which we founded and is now capably managed by the American Lung Association of Arizona.

I plan to pursue a Masters Degree in Counseling in the near future and continue to give back to the community. My wife, Beverly and our children and grandchildren welcome more of my time and energy as well.

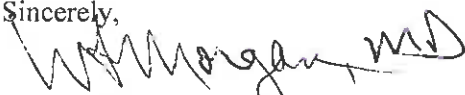

We have scheduled two open houses for me to say "Goodbye" to colleagues and patients in the month of January 2012. Please stop in and visit with me and the AAAI staff.

- Wednesday, January 18th in our Glendale office from 6pm - 8pm
- Wednesday, January 25th in our Scottsdale office from 6pm -- 8pm

If you are unable to attend and/or want to drop a line or send a picture from the past, we have an email account to make a memory book. The email address is:
morganchapter2@azsneeze.com.

Thank you for all the wonderful times, opportunities to care for our mutual patients and challenges through the years. I wish you great success and happiness in the coming, challenging years of medicine.

Sincerely,

William F. Morgan, M.D.
